DRILL for PERFECT READING

001

The word 'Olle' comes from the old Jeju dialect and refers to the narrow path between the street and one's doorstep. On average, each Jeju Olle trail is 10-18 kilometers in length and offers a unique opportunity to soak in the beauty of the Jeju coastline that varies rapidly from lowlands to highlands and back to lowlands again.

002

Seeing a fisherman catching fish expertly with a primitive net is an education in itself. What is more fascinating is when we see him count the exact number of fish he needs and throw the rest back into the sea. When asked, he will tell you that is all he needs and might be surprised that you actually asked him that question. He believes that his relationship to nature is like that of a son and mother. He takes from her, with gratitude, only what he needs.

003

It is amazing that prices are attached to sports stars saying that they are worth so much. It is also unbelievable that they are bought and sold between clubs. This is such a prevalent practice that no one stops to ask if the practice is human. What it really means is that sports stars play for money; what they do is make livings. What used to be a game like football is not so anymore.

004

There is a new Internet where users are receiving connections up to 100 times faster than people at home. It is a network so swift and so powerful that its advocates are claiming it has already changed the way we will interact with the Internet in the future.

005

The term smart technology covers microprocessor-based technology and other devices that can gather and process information to make decisions or take actions based on that information. The automatic teller machine, or ATM, was one of the first examples of smart technology made available to the public.

006

Many technologies that were originally developed for use in space programs are now used by people all over the world. Did you know that the technology for the space shuttle's fuel pumps led to the development of pumps used in artificial hearts? Or that the Apollo program led to the development of cordless tools?

007

But if you're really concerned about improving your academic performance, you might have to do the "un-cool" thing. You might have to refrain from answering a classmate who is whispering to you. You might have to let a neighbor in your science class know that you are not interested in passing notes. You might even have to ask your teacher to change your seat because it's hard for you to stay focused in your present one. Go for it! No one's approval matters more than your own.

008

One of the best things you can do to develop a unique extracurricular profile is to start thinking creatively and doing research to find activities outside of the school system to match your interests.

009

Samuel Smiles, father of the modern self-help movement, wrote in 1858 that “It is doubtful whether any heavier curse could be imposed on man than the complete gratification of all his wishes without effort on his part, leaving nothing for his hopes, desires, or struggles.”

010

A kindergarten teacher in Texas asked a six-year-old girl to put her toys away, and she fell into a passion, screaming and knocking over her chair, then crawling under the teacher’s desk and kicking so hard the drawers came out. The blow-ups occur not just among the poor students but among well-off ones as well.
